

Product Line Facts Furnishings

Travertine, Slate & Marble Mosaic/Wrought Iron- 21 Series

Natural travertine, marble, and slate are combined with hand forged wrought iron to create the striking tables, chairs, and accessory pieces of The Marble Mosaic collection.

The mosaic table tops are hand-set and grouted with industrial adhesives for maximum durability. The tops are then finished and sealed with an industrial grade sealant for superior protection. Natural wear and tear of elements may lead to blistering of silicone top seal and natural aging of travertine, marble or slate.

The table and chair frames are dipped in a zinc phosphate bath and then E-Coated to help create a weather resistant coating to aid in the delay of the onset of rust. The wrought iron chairs, bases, and frames are quality checked for strength and durability. Iron welds are ground for best look. Finally, a color powder-coating finish (pulverac powder) is applied and baked at 210°C onto the iron for stronger color and protection.

Factory supplied cushions are foam wrapped in Dacron. Inner cover is a white polyester bag and outer fabric cover is solution dyed acrylic fabric which is water resistant and UV resistant.

Wrought Iron Maintenance 21 Series

Wash frames with a mild soap and water only. Rinse and dry thoroughly. Do not use any chemicals or abrasives to clean furniture as this may affect the finish. It is strongly recommended to always cover frames /tables with furniture covers or store out of the elements when not in use so as to prolong the appearance. The frames can be treated with liquid wax for maximum protection against UV light.

Mosaic Table Top Maintenance 21 Series

Clean surface with mild soap and water and dry thoroughly. If stained with wine or coffee, wipe away immediately with mild soap and water. Do not use detergents or chemicals to clean surface as this will damage protective coating. It is strongly recommended to always cover frames /tables with furniture covers or store out of the elements when not in use so as to prolong the appearance.

21 Series One-Year Limited Warranty

Frames, Table Tops and Finishes

Alfresco Home offers a one year warranty from the date of purchase for wrought iron frame and table top construction and frame finish against defects in material and workmanship. General frame rusting in not covered. Damage to frames or structure due to improper maintenance, storage, movement,

assembly, or exposure to freeze thaw conditions or coastal salt air is not covered.

E-coating finish is warranted for one year from the date of purchase against peeling or blistering. Basic Factory supplied fabric and cushions are not covered under this warranty.

Cast Aluminum-22 Series

Items are made from cast aluminum and aluminum tube. The aluminum is polished and washed in acid solution, dried in oven, cooled, and then powder coated. Cast Aluminum will not rust.

22-Maintenance

Use a damp cloth with mild soap and water to clean the Aluminum furniture. Do not use detergents or abrasives.

All Weather Wicker- 40 Series

All Weather Wicker **Abaco XF** outdoor fibers are combined with Aluminum to create this collection. The All Weather Wicker is made from High Density Polyethylene, and is supported with color, temperature and UV stabilizers making the product suitable for 4 season climates. The aluminum is first-grade non-recycled aluminum - T5 hardness and powder coated. The All Weather Wicker is hand woven and hand tied over aluminum frames. This series has been tested and certified by the European testing agency -TUV- for tensile strength, colorfastness, UV resistance and weather resistance.

40 - Maintenance

Items in the 40 Series maybe cleaned with cold/lukewarm water. Use a soft bristle brush, sponge, or cloth. You may wish to add a little soap. Use only mild detergents. Rinse afterwards with clear cold/lukewarm water. Clean the teak table tops with a damp cloth using cold/lukewarm water. Stains (i.e. wine/grease) should be wiped away immediately with a sponge, before they are absorbed into the wood.

All Weather Wicker - 42 Series

This collection of outdoor furniture combines **Biculair®** All Weather Wicker with high grade aluminum to create a solid true to nature, weather resistant, colorfast, recyclable, and environmentally friendly product. Biculair is a similar to Hularo resin wicker which is used by several leading manufacturers of AWW product. Raw materials are imported from the United States and Canada.

The aluminum welds are first quality, the screws are stainless steel, and the frame is anodized in a matte or high-gloss finish, and treated with a color epoxy. The teak table tops in this collection are top quality and will weather to an attractive platinum-grey tint. Small cracks in the teak are part of the normal aging process. The original color can be preserved by treating wood with natural garden furniture oil. These collections are all hand woven and thus no two pieces are alike.

Factory specified cushions from the 42 series are produced with Quick Dry open cell structure foam, which is wrapped in Ureguard Dacron. The inner cover is made of a non woven polyester fiber and the outer cover is a Sunbrella Fabric.

42 – Maintenance

Items in the 42 Series may be cleaned with cold/lukewarm water. Use a soft bristle brush, sponge, or cloth. You may wish to add a little soap. Use only mild detergents. Rinse afterwards with clear cold/lukewarm water. Clean the teak table tops with a damp cloth using cold/lukewarm water. Stains (i.e. wine/grease) should be wiped away immediately with a sponge, before they are absorbed into the wood.

All Weather Wicker – 44 Series

44 Series All Weather Wicker– **Dura-Wick**, is a High Density Polyethylene resin wicker that has color, temperature and UV stabilizers making the product suitable for 4 season climates. The UV stabilizers are produced by Ciba Geigy. The Fibers are wrapped on First Quality T5 grade aluminum and powder coated tubular frames. The 44 series includes Factory supplied cushions made with high density foam wrapped in Dacron. The inner cover is made of white polyester. The outer fabric cover is produced in Taiwan and made of Spun Polyester or Olefin, solution dyed, water resistant and UV resistant.

All Weather Wicker – 46 Series

46 series- This All Weather Wicker series is produced using all weather wicker fibers from an Industry leading fiber manufacturer. Quality of this wicker resin rivals other leading brands. Fibers are often textured and are UV resistant. Wrapped on T5-6 grade aluminum frame that are fully welded and powder coated.

40-Series, 42-Series, 44-Series, & 46-Series All Weather Wicker Two year Limited Warranty.

Alfresco Home offers a 2 year limited warranty from purchase date for 40-series, 42-series, 44-series, & 46-series All Weather Wicker products against defects in materials and workmanship as outlined below. **Frames** are warranted against defects in material and workmanship for a period of 2 years. Normal wear and tear, improper assembly and general frame rusting is not covered. Chips and scratches from normal wear and tear are not covered. **All Weather Wicker fibers** are warranted for a period of 2 years from purchase date against peeling, cracking, and fading. Exposure to the elements, mildew, improper care, and normal wear and tear are not covered.

Alfresco Home reserves the right to inspect all items claimed to be defective Return authorization must be received from Alfresco Home.

Any item used for commercial purposes will not be covered by this limited warranty.

Teak - 46 Series

Top quality Teak purchased from Government Forestry Department is used to create this beautiful collection. The Teak does not require any special maintenance other than occasional cleaning. If left to age naturally outdoors, the surface of the wood will gradually change to a soft silvery-grey. To clean the teak, use a mild detergent and water. For difficult stains, use a light sandpaper.

Treating with teak oil or other preservatives is not needed to protect teakwood and will not extend the life of furniture. Its use is purely cosmetic. If you want to use teak oil then it should be applied before the furniture begins to weather and change color. Ensure the furniture is dry and free of any dust or dirt and apply one light coat of oil with a clean cloth or brush.

Beverage Coolers – 30 Series

Alfresco Home has designed the Beverage Cooler Collection to complement our furniture offerings as well as to stand alone as decorative elements in any outdoor setting. Fully glazed earthenware produced in traditional kilns varies from piece to piece as each hand made item has its own character. Most beverage coolers are supplied with a simple drainage plug but a wine cork can also do the job if needed. Small Beverage Coolers have no drainage hole. Although Alfresco Home and our quality control teams work to ensure optimal results; humidity, evaporation and the natural characteristics of melting ice and water will surely lead to some sweating and leaking of water in the beverage cooler. This is deemed as normal.

Product Line Facts Accessories

Permanent Botanicals- 10 Series

Alfresco Home offers a diverse collection of quality handmade permanent botanicals. Impeccable attention to detail creates unmatched reproductions. Life indoors can be filled with beautiful surprises year round.

Candlelight- 11, 12 & 14 Series

The Candlelight collection of Holiday and Spring/Summer candles are produced in both Italy and Asia using quality raw materials- paraffin, stearin, and palm oil wax. All décor is then hand applied by skilled artisans.

11, 12 & 14 - Maintenance

Place only on a heat resistant surface. Do not leave candle unattended. Extinguish candle before leaving room. Place and keep out of the reach of children

Cast Aluminum-22 Series

Items are made from cast aluminum and Aluminum tube. The aluminum is polished, and washed in acid solution, dried in oven, cooled, and then powder coated. Cast Aluminum will not rust.

22 - Maintenance

Use a damp cloth with mild soap and water to clean the Aluminum furniture. Do not use detergents or abrasives .

Terra Cotta and Glazed Ceramic Mosaic Table Tops/Accessories- 23 Series

Hand made terra-cotta tile and glazed ceramic mosaic table tops/accessories are suitable for both indoor and outdoor use. However the table tops are NOT frost proof and Alfresco Home strongly recommends that all of these products be brought indoors in winter climates or where the temperature drops below 40° F. These are 3-Season products.

The terra cotta and glazed ceramic tiles are hand-made using traditional methods. Wooden molds and wire cut methods are used for shaping and finishing the tile. The tiles are then fired in centuries old beehive kilns fueled by rice husks for 30 to 40 days. The tiles are set into the iron frame with sand, then wire mesh(to prevent bowing), and then concrete. An industrial grout with latex (for flexibility) is then applied. After drying for 2 days an industrial surface sealer is applied. The iron table bases, frames, and chairs are galvanized and then powder coated. All hardware used is galvanized and electro dipped.

23 – Maintenance

Use a simple damp cloth with mild soap and water to clean the table surface. Although the protective sealer applied helps prevent stains, it is recommended that liquids such as wine and/or grease be wiped away immediately to prevent them from soaking through the sealer. In particularly damp climates, it is recommended that a protective wax sealer be applied annually to terra cotta table tops. A beeswax linseed based sealer is best for the terra cotta table tops .

Try not to chip or scratch the ironwork as this may promote rust. Use an oil based touch up paint if this does occur.

Shorea Wood Collection-24 Series

Shorea is hardwood species from South East Asia. The strength and durability of this magnificent wood has made this the wood of choice for light construction, and more importantly, for veneers. Another important attribute about Shorea is its natural resistance to decay and insects. This is why it is used extensively for the exterior finish in the boat building industry. Shorea is denser than teakwood, so the naturally occurring cracks in the wood are more visible than with teak . All products are manufactured out of carefully selected materials and all parts are quality checked for functionality and quality.

24 – Maintenance

A little care and maintenance is required to keep the furniture in perfect condition. The Shorea wood, being a natural resource, will naturally roughen and turn a silver-grey color similar to teak after being left untreated outdoors. The Shorea wood should be regularly oiled with a quality hardwood treatment oil to maintain its nourishment. The regularity of Oiling will depend on the furniture's exposure to the weather. We suggest that the wood be oiled at least twice a year and in full exposure areas, more oiling may be necessary. As stated previously, if left untreated the wood will become rough to the touch and weather to a natural silver-grey color.

It is important to note that all wood expands and contracts with fluctuations in temperature and humidity which may cause surface cracking. The cracking can occur due to the natural living character of the wood. This is quite normal and does not affect the durability of the product. In order to remove any roughness or staining it is recommended to use fine grade sand paper prior to oiling.

The hardware used in the furniture is INOX stainless steel and requires no special maintenance. The Textilene parts also require no special maintenance. Use mild soap and water to clean the hardware and textilene.

Green Glaze/Slate Grey Ceramic Mosaic- 26 Series

Glazed ceramic tiles are used to create these beautiful table tops. Color variation is normal. These Lightweight table tops are suitable for 4 season climates. We suggest however in cold winter environs to store them out of the elements. The iron table bases and chairs are washed in several chemical solutions to remove dirt and grease and then dipped in a zinc solution and finally powder coated.

26 – Maintenance

Table tops should be cleaned with a mild soap solution. Do not use detergents or chemicals as they may affect the color of the grouting and strength of table top. Clean any spills (i.e. wine/grease) immediately to avoid stains. Try not to chip or scratch the ironwork as this may promote rust. Use an oil based touch up paint if this does occur.

Classic Bistros- 29 Series

The bistro and café sets in this collection are made of Iron. The iron goes through several chemical baths, a cold zinc bath to prevent rust, and then is run through an EDP process- which is an additional rust proofing wash, prior to the final powder coating process.

29 - Maintenance

Clean with mild soap and water using a damp cloth. Never use detergents or abrasives. We suggest that the product be stored out of the elements in winter climates

Hand-Made Terra-Cotta and Ceramic Artifacts/Vessels- 30 & 32 Series

Alfresco Home has designed several collections of hand-made and hand-finished terra cotta and ceramic containers that are perfect for the interior of one's home, office or place of business. Each piece has its own characteristics due to its artisan production methods, so no two pieces will be precisely alike. Colors and textures may vary from piece to piece within the same collection. Of course, these unique features help in creating these sophisticated yet extremely practical collections.

These collections not only can work for silk or live flowers but can also be used as part of a "container gift basket," as magazine holders, desk top pen holders, kitchen utensils holders or an array of other applications.

The vessels within the Artifacts Collection are produced without drainage holes and are sealed to repel water. While all of our test pieces have held water and do not sweat, we recommend that when putting fresh flowers/water in any of these pieces that a plastic liner is used to further protect the surface the product is placed on. Also note that each piece comes with rubber protector feet on the bottom of the vessel to further help protect the surface upon which the item sits. While Alfresco Home and our quality control teams work to ensure the best possible results in these areas, possible leaking, sweating or scratching of a surface while using these items may still occur. Using a plate/protecto-cork mat or plastic saucer can further protect surfaces and is strongly recommended. Always test your products in a non-critical area to make sure you have taken the proper further precautions to eliminate any issues.

Natural Stone Fountains- 70 & 30 Series

Alfresco Home has worked with a European designer to bring the latest hand-made natural stone fountains to market. With unique style, simple function, clean design and sophisticated appearance, these table top fountains make an excellent addition to anyone's home, office, or patio.

The fountains are provided with a U.S. UL approved recirculating pump and light with transformer (where applicable). The fountains are intended for indoor use only.

Please note that the fountains, while made of natural stone, are pieced together using various water-repellent adhesives and resins. Nonetheless, there always exists the possibility of water leaking and splashing, as water can drip, splash or spill out onto the surface the fountain is placed on. Proper precautions need to be put into place to help eliminate damage to any surface if these issues were to occur. Alfresco Home is not responsible for any damage to any products or surfaces that may be affected due to a fountain water issue whether it be a manufacturer's defect or consumer human error.

Ceramic & Terra Cotta Fountains- 72 Series

This unique collection of Ceramic and Terra Cotta fountains is produced in a small Artisan workshop by skilled craftsman. No two pieces are alike as glaze colors will vary from piece to piece. The fascinating mixture of textures, glazes, and surface décor make each fountain a work of art. The fountains are supplied with pump and have a felt pad on the bottom. Alfresco Home suggests not placing these fountains directly on furniture. The fountains are primarily meant for indoor use.

Maintenance - 72

The 72 series fountains can be cleaned with mild soap and water.

Resin Fountains- 73 & 74 Series

This classic collection of fountains is produced in quality lightweight resin intended for indoor use only. All fountains are supplied with pump and light (where applicable). Tabletop fountains have rubber feet on underside.

Maintenance – 73

The 73 series fountains can be cleaned with mild soap and water.

Fabrics and Cushions

All special order cushions are made in USA. The back cushions are blown polyester fiber fill while the seat cushions are densified Dacron® polyester wrap. The Notte and Brezza collections cushions are polyurethane foam with a Dacron® wrap.

Alfresco Home offers both Outdura™ and Sunbrella® fabrics. These fabrics are 100% solution dyed acrylic outdoor fabric. The fabrics are water repellent, stain and soil and UV resistant.

Maintenance – Cushions

Cushions should be cleaned with mild soap or detergent mixed with cold water. To prevent the growth of mildew, please keep your fabric clean. It is suggested to hose off your fabrics monthly with clear water. Always allow the fabric to air dry.
